

# The Gathering Presents... A Hands-On Workshop

## Spark Your Creativity: AI for Falcons Landing Residents with resident *Mark Carey (and you)*

**Thursday, December 18, 2025 7:00 p.m. Ballroom**

### Don't get left behind!

Are you curious about **Artificial Intelligence (AI)** but think it's too complicated or only for the young? It's time to bust that myth!

Join your fellow resident, **Mark Carey**, for an **engaging, myth-busting live demonstration** that will instantly show you how AI can **save you time, boost your creativity, and enhance your connections** – regardless of your age or tech experience. If you can look something up on the Portal, you can unleash the power of AI!

**Mark Carey** is a former U.S. Army officer/aviator with over 40 years in sales, marketing, and website development, and currently serves as Production Editor for the *Falcons Landing Newsletter*. He knows how to make technology *work for you*.

### Discover the Fun and Power of AI

Working with AI tools is **fun, entertaining, and surprisingly addictive!** You may not know it, but you already have all the tools you need right on your smartphone. Mark will show you exactly how to find and use them – and **we'll do it together – LIVE.**

You'll learn simple techniques to use AI to:

- **Write** heartfelt, personalized messages for cards and emails (e.g., instantly transforming a plain “Hope you feel better” into a deeply supportive note in under two seconds).
- **Generate** captivating images and stories tailored to your favorite hobbies, passions, or personal projects.
- Draft effective emails that **save you time and get results**.
- Create cool, customized visuals to share with your grandchildren—or even help them write their own story.

### It's Live, Interactive, and You're the Co-Star!

This isn't just a lecture—it's a **live, interactive experience!** You, the audience, will be in the driver's seat, directing the live demonstrations and seeing the magic happen in real-time. Come ready to be amazed... even Mark has no idea what the AI will say!

**Put the TV remote down** and come join us in the ballroom for an evening of **food, fun, and discovery**. A helpful **cheat sheet** will be distributed so you can keep creating seamlessly from your phone, tablet, or computer long after the session ends.
